

Simplify IT. Amplify your business.

HPE solutions for small and medium businesses

IT made easy

When you're running a small to midsize business (SMB), you've got a lot on your mind. That's why you need an IT foundation that's simple to purchase, deploy, and manage — and works as expected.

With HPE, you get an all-in-one, easy-to-use technology solution designed specifically for small and medium businesses (SMBs). Our scalable solutions for networking, storage, and servers are easy to use, taking the stress out of IT setup and management.

Get smooth wired and wireless connections, dependable support for business applications, effective file storage, flexible data backups, and secure remote access to keep your business connected, secure and running smoothly. With tailored offerings for light, moderate, and substantial infrastructure demands, you'll find what you need to power your business — no matter your industry.

Get more of everything

Our solutions leverage industry-leading HPE ProLiant servers and HPE Networking Instant On wired and wireless devices, offered in light, moderate, heavy, and high-density configurations.

Enhance your storage capabilities with optional HPE Storage MSA for scalable performance or HPE Storage Tape for robust data protection, ensuring rapid recovery in the event of cyberattacks or data loss.

These solutions enable:

- **Collaboration:** enhance the way people and teams work together with on-site solutions that provide superior wireless connectivity and better application performance.
- **Control:** keep data on-site for added security and control and to help conform to industry regulations regarding managing, controlling, and storing data..
- **Simplicity:** make a quick and safe decision to adopt a validated solution that is simple to purchase, deploy, and manage even if you don't have a dedicated IT department.

It's all about choice

Choose from validated solutions that are sized to meet your current and future IT needs. Consider the HPE ProLiant Microserver or ML30 Gen11 for entry-level workloads; HPE ProLiant Gen10 Plus for balanced workload performance, Gen11 for hanced performance and longevity; or DL145 or DL345 Gen11 for high performance and expandability.
